

Precursor.ca Web App Upgraded to iOS 7

Contact: Alex Narvey

Precursor Systems is pleased to announce that our multi-functional web app has been upgraded for compatibility with iOS 7.

Yes, we fell in love with iOS 7 when it was introduced at WWDC in June and have been using beta versions of it ever since. So now, with over three months experience using iOS 7 we have completely revamped the Precursor.ca Web App we introduced in May (see - Precursor PR-130527).

The Precursor.ca Web App is now chock-a-block full of iOS 7 goodness including new iconography and design references to enhance its functionality for the new operating system. And, we are hard at work adding new features like Apple's new web site push notification service for OS X 10.9 Mavericks.

The Precursor.ca Web App can be installed right to your iPhone or iPad's Home Screen just like apps you purchase from the Apple App Store.

With a simple tap, the Precursor.ca Web App will give you one handy little place to interact with Precursor.ca:

- Keep up with our internet presence on Twitter, FaceBook, LinkedIn, and Yelp.
- See us on Apple Consultants Network and FileMaker Business Alliance
- Contact us with one click via email, SMS, telephone, and/or Skype
- Read the latest Precursor Press Releases
- Check out our new BLOG for the latest and greatest tips and analysis
- Use a special mobile version of the Precursor Trouble Report Form!
