Press Release   May 27, 2014

Precursor Web Site Upgrades to FileMaker 13

Contact: Alex Narvey

Precursor Systems is pleased to announce that our web site is now upgraded to FileMaker Server 13.

Precursor Systems has long been using FileMaker and FileMaker Server to run both our business and our web site. We began with FileMaker in 1999 and have used it to run our business and web site with every version from 5.5 to the present 13.

When our web site got it make-over this year to mark our 20'th Anniversary that involved only upgrading the front end user experience using HTML5 and CSS3 to match our iOS web app. The back-end database structure remained on FileMaker Server Advanced 12.

Now we are happy to be running all our business oriented data from the radical new FileMaker Server 13 with its integration to the free FileMaker Go for iOS products and its new WebDirect features.

We use FileMaker Server 13 with both web and mobile integration for our hardware and software sales, troubleshooting reports, software asset databases, invoicing, upgrade timing and more.

FileMaker is so essential to our business that founder Alex Narvey has attended FileMaker DevCon in both 2008 and 2013, and Precursor.ca, Inc. has been a member of the FileMaker Business Alliance since 2009.

Precursor can not only design, develop and implement custom FileMaker solutions for customers for FileMaker Pro but vend the FileMaker sofware too. FileMaker 13 solutions can be operated from the web and from mobile devices to help customers work with their own data LIVE from anywhere while ntegrating bar code scanning, credit card payment, and rich media data.

FileMaker, a subsidiary of Apple, with its incredible integration of Mobile, Web and desktop in FileMaker 13 provides the ultimate custom data solution for small business.

Precursor Systems was founded in March 1994 by Alex Narvey to provide support for computer-based professionals in the Publishing, Printing, Prepress, Digital Imaging, Audio and Video industries.
