

Precursor a Proactive Support Professional

Contact: Alex Narvey

Precursor Systems is pleased to announce that company founder Alex Narvey has completed the training to be certified a Proactive Support Professional

Proactive Support Professionals continually monitor computers, servers, networks, and other information technology infrastructure for signs of potential issues. Through the use of cutting edge technology, keeping current with the latest industry news, and steady communication with their users, Proactive Support Professionals resolve issues before they become disasters.

Precursor is now a certified Proactive Support Professional - having taken the training in May at the ACES conference.

"We were an early partner utilizing Watchman Monitoring as the engine for our Precursor health agent and it has been essential to our efforts." said Narvey. "In fact, one of our real life cases where Watchman helped save the day is mentioned on the Proactive Professional Support Stories page!"

Precursor Systems was founded in March 1994 by Alex Narvey to provide support for computer-based professionals in the Publishing, Printing, Prepress, Digital Imaging, Audio and Video industries.
